Bring brilliance
and beauty to your
garden this winter with

Berry-Bearing Shrubs and Trees

Viburnum dilatatum (Linden Viburnum)

BRIGHTEN your outlook this fall and winter with these garden friends that are so rich in year-round gifts. So graceful their composition, so lavish their foliage, so sweet their blossoms in spring, it is yet in the fall and winter that you enjoy them most. For then their fruits and berries delight the eye and gladden the heart.

Pyracantha coccinea (Evergreen Scarlet Firethorn)

Lonicera morrowi (Morrow Honeysuckle)

Viburnum molle (Kentucky Viburnum)

Crataegus cordata (Washington Thorn)

COLOR is their talent—the startling brilliant color of their fruits. *Viburnums*—red, purple, blue, black. *Lonicera*—coral and scarlet. *Photinia*—red against yellow leaves. *Symplocus paniculata*—bright turquoise blue berries. Consider too these colorful small-growing trees: *Pyracantha*—orange berries; *Crataegus*—scarlet fruit; *Oxydendron*—golden tassels against crimson leaves. Andorra advocates planting Berry-Bearing shrubs and trees NOW, for fall and winter garden glory.

Lonicera tatarica (Tatarian Honeysuckle)

Andorra's Landscape Architect has selected several groups of Berry-Bearing Shrubs and Trees for various uses: A colorful corner; a shrubby-screen; a garden boundary; a lawn enclosure. Each group is chosen for variety in size, shape, color; each group contains at least one tree for accent and interest. They are offered to you (see next page) at VERY SPECIAL VALUES.

Viburnum cassinoides

FOUR GROUPS of Berry-Bearing Shrubs and Trees, from Andorra's fine, healthy stocks, at VERY SPECIAL VALUES. The enclosed card is for your convenience. (Or ask for Special Values on your own selections.)
